

GB SPECIALIST

ACCESS SOLUTIONS

A worker wearing a white helmet, safety harness, and dark clothing is performing maintenance on a building facade. The worker is using a power drill and is positioned on a vertical surface. The background shows the structural elements of a building, including beams and windows. The entire image is overlaid with a semi-transparent blue filter.

About

GB Specialist Access Solutions (GB SAS) consolidates specialist services, leading in niche markets. Our expertise ensures top-tier solutions tailored to your unique needs, driving success and efficiency in every project. Trust GB SAS to lead the way in specialised access services, delivering excellence nationwide for a wide range of clients in property management, building surveying and main contracting.

SAFETY TESTING

At GB ACCESS we deliver a wide range of specialist services, we are fully up to date with the latest industry legislation and safety standards.

We offer competitive rates on all service jobs while completing site visits within a week of receiving your order.

We work in close partnership with our clients, offering comprehensive site surveys to assess and tailor solutions before any work begins. This attention to detail ensures full transparency and peace of mind.

We're able to provide high-quality service at competitive prices while fostering long-term partnerships.

We provide the most comprehensive certification in the industry, giving our clients complete confidence that every piece of equipment is fully tested, compliant, and ready for use.

All repairs and upgrades are carried out from trusted suppliers whose products meet or exceed current legislation. We partner with FALLPROTEC, the leading Fall protection and Façade Access manufacturer in Europe, allowing us to maintain strict quality control. This commitment to excellence means our clients benefit not only from full compliance — but from equipment they can rely on, every time.

SAFETY INSTALLATION

At GB Specialist Access Solutions, we take pride in delivering intelligent, fully tailored access and safety systems — from the initial concept through to final commissioning. No matter the complexity, we bring clarity, efficiency, and innovation to every project.

Our people are at the heart of what we do — a team of highly trained professionals, each bringing years of industry experience and an unwavering commitment to quality. Clients trust us because we combine technical precision with a deep understanding of UK safety standards, ensuring every solution is robust, compliant, and future-ready. We're not just service providers — we're long-term partners who take ownership of every project, offering peace of mind from the very first conversation

GB Specialist Access Solutions delivers a comprehensive range of safety and access systems, including:

- Fall protection systems
- Structurally affixed and freestanding handrails
- Walkways and access ladders
- Custom-designed solutions for both individual and collective safety

Our expert team operate nationwide, providing robust, regulation-compliant systems for buildings of every shape, size, and age — from heritage properties to state-of-the-art commercial sites. Whatever the challenge, we build access around you.

At GB Specialist Access Solutions, we take a holistic approach to working-at-height safety, specialising in the design and installation of tailored fall protection systems — with a strong focus on protecting personnel operating in roof environments.

By engaging with our team early in the project cycle, clients gain access to our deep technical knowledge and industry insight. We offer guidance on the most appropriate, compliant systems to suit specific site needs — saving time, reducing risk, and ensuring long-term usability.

Our extensive product range includes fall arrest, fall restraint, and bespoke access systems, enabling us to deliver fully integrated solutions for any environment — from new-builds and heritage structures to complex, architecturally challenging sites.
